PRECIS

INTRODUCTION

THE COMPANY

Founded in 1996, Precis Spirits was established to develop and market super-premium spirit brands. Based in Mölnlycke, Sweden and Santa Barbara, California, the Company has developed both national and international distribution of its products.

THE BRAND

Originating from Sweden, Precis are the brain child of Swedish engineer Anders Rundcrantz. "Precis" is the Swedish translation for precise/precision, which relates to the brand's unique production technique, Precision Distilling. This technique is a revival of century old Swedish distilling traditions merged with modern techniques, resulting in a unique production method. When combined with pure Swedish water (some of the purest water in the world), the resulting vodka is so clean it requires no filtration. Precis Vodka is produced in Sweden and packaged in a stunning design package.

VODKA

Product of our unique modern distillation process. It goes through five separate distillations and is ruggedly strained and never filtered, creating a smooth and clean finish.

PISTACHIO

Warm bouquet of Pistachio with subtle hints of Vanilla, that makes you think of Pistachio ice cream from your youth. An inviting mouth feel that rests gently on your tastebuds. Offering you a truly unique flavor. Best as a shot or with soda on the rocks!

AQUAVIT

Aquavit is gentler cousin of Gin created with a Précis Vodka. It has an unexpected blend of Caraway seed and Dill. Softly highlighted with Lemon peel and Anise.

THE WATER

An important component of the Precision Distilling™ technique is the purity of the water used at all phases of the process. Sweden is known for its clean lakes and our spirits are made from our Purest Spring Lake Water. No filtration is necessary.

Sweden is world renowned for its hand blown glass industry. Precis leverages this tradition with its unique package design created and developed by well-known Swedish glass designer.

GLASS DESIGN

Sweden is world renowned for its glass design industry. Precis leverages this tradition with its unique package design created and developed by well-known Swedish glass designer.
